FAQ

What does race into the night mean?

The race will start late afternoon and end at approximately dusk.

Will I need lights?

Donington has track lighting but we do suggest at the minimum that you have marker/side lights to allow you to be seen.

Will there be a pit stop?

Yes – all cars must stop for a mandatory 60 seconds.

What are the rules on car eligibility?

Entrants do not need to be registered with Bernie's V8s. And for this race we are fully relaxing our regs, bring your slicks, attach the biggest aerofoils you can find and no need to hide your sequential boxes! Come and have fun.

How does it work with cars running on slicks with aero... ?

To level the playing field, cars running outside of usual BV8 regs will be subject to a time penalty at their pit stop. We will look at weather closer to the time but between 15-30 second handicap.

How does the relay work?

Just like a pit stop... driver A pulls into the pits. Their car remains stationary for 60 seconds (or longer if handicapped) and then driver/car B leaves the pits.

Can I have a whinge and moan if I don't win?

Sorry, same BV8 rules apply. No moaners – only smiles permitted.
